FIELD SERVICE AND REPAIR CAPABILITIES

On Site Service
- Hydraulics
- System Troubleshooting
- Installation
- Start-up
- Preventative Maintenance
- Component Repair
- Fluid Service

In-House Repair
- We are an authorized repair facility for Bosch Rexroth and Tokimec brands of hydraulic valves, pumps, and cylinders.
- In addition, we repair Vickers, Parker, Dennison, Eaton and Sundstrand brands along with other manufacturers brands of valves, cylinders, and pumps.
- We use only “original” new factory service parts and components when repairing or replacing your hydraulic valves, cylinders, and pumps.
- All repaired or replacement hydraulic components will receive up to a one year warranty based on workmanship or material failure.

After Hours Emergency Service
On weekends and after normal business hours, a technician will return your call promptly. The after hours emergency telephone number is 1-888-FLODYN.

Did you know?
The majority of hydraulic failures are due to contamination. If we notice that your failure is due to contamination, we offer a service that will address this problem. Our technicians are available to:
- Take Fluid Samples for Testing
- Condition Fluids on your Site
- Recommend Corrective Action

Proper filtration has been proven to increase up time, reduce maintenance costs and provide long life to hydraulic equipment. We represent and provide absolute filtration manufactured by Hydac, Donaldson, and PTI.
